PURCHASING INFORMATION**

**"Be Greeted Psychoneurotics", 30 min. colour.**

... a look at Dr. Kazimierz Dabrowski in clinical situations and in discussion with colleagues. This film is designed for the student of Dabrowski who is interested in experiencing something of the source of the theory. Through watching Dabrowski at work, it becomes clear that his therapy is almost a non-therapy, that the patient is encouraged to discover auto-psychotherapy.

**"The Java Shoppe Interview", 20 min. colour.**

... Dr. Dabrowski answers questions about his theory, "Positive Disintegration". In the warm setting of a European-style coffee house, he patiently converses with the filmmaker, clarifying certain questions of the day. His answers touch on the subjects of death, drugs, and the different potential between man and woman, to name a few.
